PROFESSIONAL SUMMARY

Results-driven engineering leader with 14+ years of software development experience, including 6+ years in technical leadership roles. Specialises in backend and microservices engineering with deep expertise in Java, Spring Boot, and RESTful APIs. Currently acting as Deputy Chapter Lead at TSB Bank Plc, overseeing a team of 11 engineers, driving tech-debt remediation, security vulnerability management, and process improvement while continuing to deliver hands-on technical contributions. Proven track record of leading large-scale microservices platforms in high-volume, customer-facing banking environments. Passionate about leveraging AI and Agentic AI to accelerate learning, improve delivery timelines, and bring measurable value to customers and the organisation.

Currently on a Skilled Worker Visa; will require 1 year of sponsorship before becoming eligible for ILR.

CORE COMPETENCIES & SKILLS

Primary	Java, Spring Boot, Spring Framework, Spring MVC, RESTful APIs, Apache Kafka, JPA / Hibernate, JUnit, Mockito, SQL, Maven, Gradle
Working Knowledge	Amazon Web Services (AWS), Docker, Kubernetes, HTML, CSS, JavaScript, AngularJS,
AI & Tooling	GitHub Copilot (power user), Agentic AI tools, Jira, Confluence, Jenkins, Bitbucket, GitHub, Dynatrace, Kibana, Grafana
Practices	Agile / Scrum, CI/CD, Microservices Architecture, System Design, Code Review, Tech-Debt Management, Security Vulnerability Management (Veracode, SAST/DAST)
Leadership	Chapter Lead, Technical Lead, People Management (11 direct reports), Mentoring & Coaching, Resource Planning, Process Improvement, Stakeholder Engagement

WORK EXPERIENCE

Deputy Chapter Lead (Digital Chapter) & Lead Engineer - Full Stack

Jan 2026 - Present

TSB Bank Plc | London, United Kingdom

Acting as Deputy Chapter Lead for the Digital Chapter whilst continuing to operate as Lead Engineer - Full Stack, balancing strategic people leadership with hands-on technical delivery.

Chapter Lead Responsibilities (circa 80% of role):

- Lead and support a chapter of 11 engineers - 3 direct reports from TSB and 8 from a service provider - across multiple feature teams, conducting regular 1-2-1s, career development conversations, and performance reviews for direct reports whilst providing technical guidance and oversight to the wider group.
- Collaborate with Delivery Leads, Tech Leads, and Product Owners to assign Chapter Members to feature teams, balancing workload, skills, and delivery priorities.
- Lead the Digital Chapter's tech-debt programme, including triage and remediation of Veracode vulnerabilities, penetration-test findings, SAST/DAST issues, and broader security hygiene.
- Drive continuous process improvement within the Digital Engineering team, identifying inefficiencies and implementing structured solutions to increase delivery throughput.
- Facilitate alignment between technical standards and business goals by actively participating in feature-delivery and design discussions.

Engineering Responsibilities (circa 20% of role):

- Deliver full-stack feature work spanning Java Spring Boot microservices and AngularJS / HTML / CSS front-end changes.
- Actively utilise AI and Agentic AI tooling (including GitHub Copilot) to accelerate learning of front-end technologies, improve code quality, and reduce delivery cycle times - recognised as one of the organisation's leading adopters.
- Investigate and resolve production incidents using Dynatrace, Kibana, and Grafana.

Lead Engineer - Full Stack

Mar 2022 - Dec 2025

TSB Bank Plc | London, United Kingdom (previously Senior Microservices Engineer, promoted Jan 2025)

Joined as Senior Microservices Engineer in the Digital Engineering team with responsibility for delivering high-quality microservices and technically leading a team of 50+ offshore developers. Promoted to Lead Engineer - Full Stack in January 2025 as part of a company restructure.

As Senior Microservices Engineer:

- Supervised and delivered multiple resilience and performance improvement initiatives, including detailed investigations and code upgrades across Java Spring Boot microservices deployed on AWS and on-premises infrastructure, resulting in substantial cost savings for the bank.
- Implemented new RESTful API endpoints supporting enhanced mobile and web banking journeys, enabling seamless and secure interaction with banking applications.
- Orchestrated the technical side of feature delivery by liaising with Product Owners, Architects, Scrum Masters, and Release Management.
- Defined and enforced coding standards, conducted code reviews, and evaluated delivery quality across offshore teams.
- Identified and delivered multiple process-improvement initiatives within the Engineering team.
- Investigated production incidents through code analysis, log review, and monitoring tools including Dynatrace and Kibana.

As Lead Engineer - Full Stack:

- Built working proficiency in front-end technologies (HTML, CSS, JavaScript, AngularJS) to enable end-to-end feature delivery.
- Delivered full-stack features requiring both back-end microservices changes and front-end UI updates.
- Investigated and remediated front-end CAST and DAST vulnerabilities, improving the application's security posture.
- Leveraged GitHub Copilot extensively to accelerate front-end learning and delivery, becoming one of the organisation's leading adopters of the tool.

Application Development Associate Manager

Feb 2015 - Mar 2022

Accenture Solutions Pvt. Ltd | Pune, India

Progressed through four promotions - from Software Engineer to Application Development Associate Manager - whilst working on the Barclays Mobile Banking (BMB) Gateway application. Advanced from individual contributor to Technical Lead for the Transactions Stream.

- Spearheaded the migration of the BMB Gateway from a Spring Framework monolith (on-premises) to a distributed Spring Boot microservices architecture deployed on AWS, providing technical leadership across the Transactions Tower.
- Led a team of 15 engineers - managing 3 Team Leads directly, with 12 further engineers reporting through them - overseeing quarterly and annual performance evaluations, increment discussions, and career development conversations.
- Owned the end-to-end delivery of multiple priority and regulatory features including Loans, Overdrafts (CMA and HCC), Adobe Banners, Mobile Cheque Deposit, Security Filters, and Customer Transactions.
- Represented the development team in Scrum ceremonies, communicating progress, highlighting blockers, and proposing solutions to stakeholders.
- Delivered multiple enhancements to application performance, reliability, and scalability through deep expertise in Java and the Spring Framework.
- Implemented code, wrote JUnit and Mockito unit tests, performed defect analysis, and deployed application changes across environments.

Associate Software Engineer (Contractor)

Sep 2013 - Feb 2015

Pyramid IT Consulting (on-site at Accenture Solutions Pvt. Ltd) | Pune, India

- Delivered changes for Barclays Mobile Banking whilst simultaneously acting as the sole backend developer for two internal Accenture mobile applications, demonstrating strong time management and prioritisation skills.
- Designed and implemented the base framework for internal applications using Java and Spring Boot, gaining foundational microservices experience.
- Took ownership of end-to-end backend delivery, including coding, unit testing (JUnit), testing support, defect analysis, and deployment.
- Gained experience in both Agile and Waterfall delivery models across concurrent projects.

Graduate Intern Developer

Oct 2012 - Jul 2013

Barclays Technology Centre India | Pune, India

- Collaborated with Product Owner and Solution Architect on requirements gathering for an internal web application built from scratch.
- Implemented backend services using Spring MVC and designed a vanilla front-end using HTML, CSS, and JavaScript calling backend microservices.
- Wrote JUnit test cases and performed defect investigation and resolution.

EDUCATION & PROFESSIONAL DEVELOPMENT

Level 4 Apprenticeship - Business Analysis with AI

2025 - Present (In Progress)

Corndel / Aptem | Sponsored by TSB Bank Plc

- Developing skills in Business Analysis, AI and Agentic AI, applying learnings directly to process improvement and delivery optimisation in the Digital Chapter.

Bachelor of Computer Engineering

Jun 2008 - May 2012

University of Pune | Pune, India
